COURSE OVERVIEW: This course is framed to have hands on experience on design software so that students are able to model various mechanical engineering components.								
COURSE OUTCOMES: At the end of the course, the student should be able to: 1. Draw 2D drawings by sketcher module using design software. 2. Model 3D objects by Part Design module using design software. 3. Sketch, model and assemble various machine part drawings using design software.								
Part A		Sketcher Module						
1. Draw given 2D diagrams by using sketcher module. (Any 3 diagrams)								
Part B		Part Design Module						
1. Model given 3D objects by using part module. (Any 4 models)								
Part C		Assembly Design Module						
1. Model and Assemble parts of knuckle joint. 2. Model and Assemble parts of stuffing box. 3. Model and Assemble parts of universal coupling.
