

# ROBOTICS CLUB

MLRIT Main Website – Club Page Content Submission

## 1. Official Club Name

**Robotics Club** – a technical student community under the ECE Department at MLR Institute of Technology.

## 2. Updated Club Logo

## 3. Vision / Tagline

---

*“Passionate innovators exploring Robotics, AI, Embedded Systems, and Automation through hands-on learning.”*

The club aims to turn ideas into intelligent solutions by building innovative, real-world engineering projects and empowering future technology leaders through innovation, collaboration, and continuous learning.

## 4. About the Club

---

The Robotics Club is a platform for students to explore emerging technologies and transform their ideas into practical engineering solutions. The club encourages students to gain hands-on experience in robotics, artificial intelligence, embedded systems, automation, electronics, and related technologies.

Through practical sessions, workshops, projects, competitions, collaborations, and technical activities, the club provides students with opportunities to develop both technical and problem-solving skills. The club focuses on creating an environment where students can learn, build, innovate, collaborate, and compete, preparing them to address real-world engineering challenges.

### **What makes the club unique – Collaborations**

The club partners with professional and innovation-focused organizations to give students wider technical exposure:

- IETE (Institution of Electronics and Telecommunication Engineers) – technical education, workshops, seminars, networking, and career development.

- IIC (Institution's Innovation Council) – a Ministry of Education initiative supporting project development, hackathons, competitions, and problem-solving.
- IEEE RAS (IEEE Robotics and Automation Society) – technical learning, competitions, conferences, networking, and career readiness.

## 5. Purpose of the Club

---

The club exists to inspire students to develop technology that addresses real-world challenges, provide hands-on learning through robotics projects and practical sessions, and foster creativity, innovation, and critical thinking.

### Key Objectives

- Inspire innovation and creativity among students.
- Develop practical robotics and automation skills.
- Encourage teamwork and problem-solving.
- Provide exposure to emerging technologies.
- Promote project-based and experiential learning.
- Prepare students to become future technology leaders.
- Encourage participation in technical competitions and project exhibitions.

## 6. Activities & What Happens in the Club

---

### Workshops & Training

- PCB design and development workshops
- Robotics workshops
- Embedded systems workshops
- ARM architecture and microcontroller-based learning
- Technical training sessions

### Competitions & Challenges

- Robothons
- Robotech events
- Robo games
- Circuit debugging challenges
- Project-based competitions

### Knowledge Sharing

- Technical talks
- IEEE RAS sessions
- Seminars and interactive sessions
- Paper and poster presentations

### Innovation & Project Development

- Real-world robotics projects

- Embedded-system-based projects
- Automation solutions
- Project exhibitions
- Prototype development

#### **Notable Projects Developed**

- Bore Bot – Borewell Rescue Robot: rescues people, especially children, trapped in narrow borewells.
- Brain-Controlled Wheelchair: an intelligent mobility device allowing people with severe physical disabilities to control movement using brain signals.
  - AquaBotX: an autonomous robot that monitors water quality and collects real-time environmental data.
- Winding Machine: an automated machine that winds wire or thread onto a spool with precision, speed, and consistency.

#### **Achievements & Recognition**

- Participation in Robo Games / Bots, Project Expos, and technical competitions
- Paper and poster presentations
- Student internships
- PCB boards developed by club members
- News and media coverage
- 10th Anniversary Celebrations

## 7. Events Conducted

---

Major events conducted / planned by the club (tentative calendar for Academic Year 2026–2027):

| Event Name                                             | Date                 | Target Participants     |
|--------------------------------------------------------|----------------------|-------------------------|
| PCB Workshop                                           | August 12 & 13, 2026 | 1st & 2nd Year Students |
| Robothon                                               | September 2, 2026    | All 4 Years             |
| Circuit Debugging                                      | October 21, 2026     | 2nd & 3rd Years         |
| Paper Presentation, Poster Presentation & Project Expo | November 23, 2026    | All 4 Years             |
| Talk Session on IEEE RAAS-1                            | December 17, 2026    | 1st, 2nd & 3rd Years    |
| Talk Session on IEEE RAAS-2                            | December 24, 2026    | 1st, 2nd & 3rd Years    |
| Workshop on STM                                        | January 22, 2027     | 2nd & 3rd Years         |
| Robotech                                               | February 2, 2027     | National Players        |

*Note: The above schedule is tentative and may be subject to changes.*

### Flagship / Star Events

- PCB Workshop
- Robothon
- Robotech
- Talk Sessions on IEEE RAS
- ARM Architecture Workshop
- Project Expo
- Paper & Poster Presentation
- Circuit Debugging

## 8. Star Events :

---

- PCB Workshop

- Robothon :

- Robotech poster:

- Project Expo :

## 9.Event Photos & Videos

---

Photographs and videos to be provided, covering a good spread of different activities rather than repeated shots from one event. Recommended categories:

- Workshops
- Robothon / Robotech
- Project Expo
- Paper & Poster Presentations
- Technical Talk Sessions
- Project Demonstrations
- Club Collaborations
- 10th Anniversary Celebrations

## 10.Club Website / Online Presence

---

**Instagram:** mlrit\_robotic\_club

**LinkedIn:** mlrit\_robotic\_club

**Individual Club Website:** Not yet available – to be updated.
