

MARRI LAXMAN REDDY INSTITUTE OF TECHNOLOGY

Department of Computer Science and Engineering

AI Knowledge Base Document

1. Department Overview

The Department of Computer Science and Engineering (CSE) at MLR Institute of Technology has been offering a Bachelor of Technology (B.Tech) programme in Computer Science and Engineering since 2005, with an initial intake of 60 students.

The department provides excellent infrastructure, a dedicated research centre, strong industry ties, and a culture of innovation. Faculty members are highly qualified experts, and the curriculum is regularly updated to reflect the latest developments in the field.

Students are encouraged to participate in coding competitions, hackathons, and seminars to develop practical skills and stay current with industry trends.

Key Highlights

- B.Tech programme established in 2005 with an initial intake of 60 students.
- Current B.Tech intake: 840 students per year (grew from 60 → 120 → 180 → 240 → 840).
- M.Tech programme offered since 2011.
- NBA Accredited since 2008.
- Additional 10% seats available under the Lateral Entry Scheme.
- Dedicated research centre with state-of-the-art infrastructure.
- Active Centers of Excellence in Mobile App Development, ETL/Data Integration (Virtusa), IoT, and Cloud Computing & Big Data.
- Faculty and students regularly publish in national and international journals and conferences.
- Active CSI (Computer Society of India) institutional member since 2010.
- SWAYAM/NPTEL integration with credit-transfer facility for students.

2. Vision and Mission

Vision

Promote Innovation-centric education to produce globally competent graduates in Computer Science and Engineering education and research capable of building a strong and developed nation.

Mission

Strengthen the department interaction with Multi National Companies to enhance graduate technological advancement skills and research capabilities.

3. Programs Offered

B.Tech — Computer Science and Engineering

Year Established	2005
Initial Intake	60 students
Current Intake	840 students per year
Accreditation	NBA Accredited since 2008
Lateral Entry	Additional 10% seats — direct 2nd year admission for diploma holders

Intake Growth Timeline — B.Tech CSE

Year	Intake
2005	60
2007	120
2012	180
2013	240
2024	840

M.Tech — Computer Science and Engineering

Year Established	2011
Initial Intake	6 students
Current Intake	18 students

4. Program Outcomes (POs)

A graduate of the Computer Science and Engineering programme will demonstrate:

Code	Description
PO1	Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
PO2	Problem Analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
PO3	Design/Development of Solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for public health and safety, and cultural, societal, and environmental considerations.
PO4	Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of information to provide valid conclusions.
PO5	Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities, with an understanding of their limitations.
PO6	The Engineer and Society: Apply reasoning informed by contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to professional engineering practice.
PO7	Environment and Sustainability: Understand the impact of professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of and need for sustainable development.
PO8	Ethics: Apply ethical principles and commit to professional ethics, responsibilities, and norms of engineering practice.
PO9	Individual and Team Work: Function effectively as an individual, and as a member or leader in diverse teams and in multidisciplinary settings.
PO10	Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, including writing effective reports and design documentation, making presentations, and giving and receiving clear instructions.
PO11	Project Management and Finance: Demonstrate knowledge and understanding of engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects in multidisciplinary environments.
PO12	Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

5. Program Specific Outcomes (PSOs)

Code	Description
PSO1	Understand the structure, evolutionary changes, and development methodologies of software systems to address modern computing challenges.
PSO2	Develop intelligent and autonomous systems to cater to societal needs, especially in the fields of health care, e-commerce, banking, agriculture, cyber security, and insurance.

6. Research Centre and Research Areas

The department has established a dedicated research centre equipped with state-of-the-art infrastructure and facilities. It provides a platform for faculty members, research scholars, and students to engage in research activities and collaborate with industry experts. The centre focuses on interdisciplinary research.

Research Areas

- Artificial Intelligence
- Machine Learning
- Computer Networks
- Cybersecurity
- Software Engineering
- Mobile Application Development
- Internet of Things (IoT)
- Big Data and Cloud Computing
- Data Mining and Warehousing

7. Laboratories

Case Tools and Web Technologies Lab	
Purpose	Used for CaseTools and Web Technologies practical sessions.
Facilities	69 desktop computers, 1 projector, UPS, ACs, fans, white marker board, display boards (equipment list, timetables, syllabus). Basic and problem-specific software installed on all systems.

Used By	III Year, Semester I (III/I) B.Tech
----------------	-------------------------------------

Data Structures and Web Services Lab

Purpose	Used for Data Structures and Web Services practical sessions.
Facilities	30 desktop computers, 1 projector, UPS, ACs, fans, white marker board, display boards. Basic and problem-specific software installed on all systems.
Used By	I/I M.Tech (Data Structures); I/II M.Tech (Web Services)

Cryptography and Network Security Lab

Purpose	Used for Cryptography and Network Security practical sessions.
Facilities	30 desktop computers, 1 projector, UPS, ACs, fans, white marker board, display boards. Basic and problem-specific software installed on all systems.
Used By	III Year, Semester I (III/I) B.Tech

Mobile Application Development Lab (Android)

Purpose	Used for Mobile Application Development using Android practical sessions.
Facilities	36 desktop computers, 1 projector, UPS, ACs, fans, white marker board, display boards. Software: Android Studio, Nox Player, JDK.
Used By	III Year, Semester II (III/II) B.Tech

Operating Systems Lab

Purpose	Used for Operating Systems practical sessions.
Facilities	60 desktop computers, 1 projector, UPS, ACs, fans, white marker board, display boards. Basic and problem-specific software installed on all systems.
Used By	II Year, Semester II (II/II) B.Tech

Java Programming Lab

Purpose	Used for Java Programming practical sessions.
Facilities	60 desktop computers, 1 projector, UPS, ACs, fans, white marker board, display boards. Software: JDK.
Used By	II Year, Semester II (II/II) B.Tech

Cloud Computing Lab

Purpose	Used for Cloud Computing practical sessions.
----------------	--

Facilities	30 desktop computers, 1 projector, UPS, ACs, fans, white marker board, display boards. Basic and problem-specific software installed on all systems.
Used By	IV Year, Semester I (IV/I) B.Tech

Linux Programming Lab

Purpose	Used for Linux Programming practical sessions.
Facilities	30 desktop computers, 1 projector, UPS, ACs, fans, white marker board, display boards. Basic and problem-specific software installed on all systems.
Used By	III Year, Semester I (III/I) B.Tech

Project Work Lab

Purpose	Used for final-year project development and industry-oriented mini projects.
Facilities	60 desktop computers, 1 projector, UPS, ACs, fans, white marker board, display boards. Basic and problem-specific software installed on all systems.
Used By	IV/II B.Tech (major projects); IV/I B.Tech (industry-oriented mini projects)

Object Oriented Programming through C++ Lab

Purpose	Used for Object Oriented Programming through C++ practical sessions.
Facilities	36 desktop computers, 1 projector, UPS, ACs, fans, white marker board, display boards. Basic and problem-specific software installed on all systems.
Used By	II Year, Semester I (II/I) B.Tech

Data Mining and Warehousing Lab

Purpose	Used for Data Mining and Data Warehousing (DMDW) practical sessions.
Facilities	30 desktop computers, 1 projector, UPS, ACs, fans, white marker board, display boards. Software: Informatica, Weka.
Used By	III Year, Semester II (III/II) B.Tech

Database Management Systems Lab

Purpose	Used for Database Management Systems practical sessions.
Facilities	36 desktop computers, 1 projector, UPS, ACs, fans, white marker board, display boards. Basic and problem-specific software installed on all systems.
Used By	II Year, Semester II (II/II) B.Tech

8. Teaching Methodologies

The department uses the following student-centric teaching methods:

- Think Pair Share
- In-class Teams
- Collaborative Learning
- Flipped Classroom
- Group Writing Assignments

9. Special Programs and Centres of Excellence

COE — Mobile Application Development

Covers Android app development using Java programming language and the Android development environment. The two dominant platforms covered are iOS (Apple) and Android (Google). Students learn to build real mobile applications using Android Studio and related tools.

COE — Virtusa (ETL and Data Integration)

Covers ETL (Extract, Transform, Load) — a three-stage process in database usage and data warehousing. The primary tool covered is Informatica PowerCenter — the most widely used ETL/Data Integration tool globally. Topics include data extraction, transformation, loading, data masking, data quality, data virtualization, and master data management. In Data Integration/Warehousing projects, up to 80% of total time is spent on enforcing business data domain and integrity rules through Data Transformations.

COE — Internet of Things (IoT)

Covers IoT as a network of interconnected devices embedded with sensors, software, and network connectivity. Hardware platforms covered: Arduino and Raspberry Pi. Topics include types of sensors and connectivity, analog-to-digital signal conversion, Arduino-specific and Raspberry Pi-specific shields and software libraries, cloud computing fundamentals, sensor reading, internet connectivity (wired and wireless), and Android phone integration.

COE — Cloud Computing and Big Data

Training on the Hadoop ecosystem — the backbone of modern big data processing. Big Data refers to large datasets that cannot be processed using traditional computing techniques. Hadoop is an open-source framework that allows storing and processing big data in a distributed environment across clusters of computers using simple programming models. It is designed to scale from single servers to thousands of machines.

SWAYAM / NPTEL Integration

The department is integrated with SWAYAM, a Government of India programme providing free online courses from India's best universities. Courses span from 9th class to post-graduation level. Students can transfer credits earned from SWAYAM/NPTEL courses to their academic records. More than 1,000 specially chosen faculty from across India have contributed to these courses.

SWAYAM Course Format (4 Quadrants):

- Video lectures
- Specially prepared downloadable and printable reading material
- Self-assessment tests through tests and quizzes
- Online discussion forum for clearing doubts

NPTEL Coordinators at MLRIT CSE Department:

S.No	Name	Designation	Phone Number
1	K. Pushpa Rani	Asst. Prof	7799375067
2	G. Sowmya	Asst. Prof	7780192601

10. Professional Bodies — CSI

About CSI (Computer Society of India)

- Formed in 1965.
- Has 72 chapters across India.
- Has 511 student branches.
- Has more than 100,000 members including IT industry leaders, scientists, and academicians.
- Mission: Facilitate research, knowledge sharing, learning, and career enhancement for all categories of IT professionals; inspire and nurture new entrants into the IT community.

Benefits of CSI Membership

- Access to CSI Communications (free).
- Discounted copy of the quarterly Journal of Computer Society of India.
- R&D grant support and travel support for members presenting at leading international conferences.
- 25% to 50% registration fee concession at CSI events for student members.

- Opportunity to organise and participate in events such as guest lectures and student seminars.
- 20% discount on IEEE (CS) membership fee.
- CSI examinations and certifications.
- Young IT Professional Awards at regional and national levels.
- Access to CICC training courses conducted in Japan.

CSI at MLRIT

- MLRIT has been a CSI educational institutional member since 2010.
- Active student chapter in the Hyderabad region with more than 100 student members (renewed annually).
- Many faculty members are lifetime members of CSI.
- MLRIT received the Best Accredited Student Branch Award at CSI Annual Convention 2016.

CSI Coordinators

S.No	Name	Designation
1	Dr. K. Srinivas Rao	Director
2	Dr. N. Chandra Sekhar Reddy	HOD – CSE
3	Dr. B. Madhuravani	HOD – AIML, CS, DS
4	Vijay Keerthika	Asst. Professor

CSI Events Conducted at MLRIT

- Awareness Program on CSI — 21st July 2015, Closed Auditorium, MLRIT; addressed by Mr. Raju L. Kanchibhotla, Vice President, CSI.
- CSI Golden Jubilee Annual Student Convention (ZAVTRA 2016) — state-level technical event with paper presentations, technical and non-technical events; co-organised with Zavatra and supported by CSI. Chief Guests: Sri R. Srinivas Rao (VP Wipro), Sri Raju Kanchibotla (Regional VP CSI India), Dr. A. Govardhan (Principal JNTUH), Sri Sudhakar Ch. (CEO Raskey Software Solutions), Brig. P. Ganesham (President Pallesrujana).
- CSI National Convention and Conference on Digital Economy (ZAVTRA 2017).
- India's Blockchain Revolution event — attended by MLRIT CSI students at Novotel, Hyderabad.
- JAVA Hackathon — participated in by MLRIT CSI students.
- RUST Hackathon — organised at MLRIT.

CSI Student Achievements

- Mr. G.V. Seshasai [CSI-01328817], IV year B.Tech (IT), published an article on "Cloud Computing on DEEP WEB" on www.csi-india.org.

11. Student Achievements

IEEE Engineering Project Expo 2017

Students B. Prem Sagar, M. Poojitha, and S.A. Arpitha (IV CSE) participated in the Engineering Project Expo organised by IEEE-WIE and won 1st and 2nd Prizes at Nalla Narsimhareddy Group of Institutions, Integrated Campus, Hyderabad on 18th February 2017.

Student Mini Projects Expo and Technical Seminars 2016

Technical Seminars conducted on 10th November 2016 at MLRIT. Chief Guests: Shri Raju L. Kanchibotla (Vice President – Region V, CSI) and Mr. Nagarjun V. Malladi (Delivery Head, Life Sciences, Tech Mahindra, Madhapur, Hyderabad).

- 1st Prize: Pratul Chandra (II Year IT) — "AI with Self Driven Cars"
- 2nd Prize: N. Mahalakshmi (I Year CSE) — "ASIMO"
- 3rd Prize: R. Epaprodith (II Year CSE) — "Bio Metric Security System"

National Map Hunter Award

A. Sai Hari (IV CSE-A) received the National Level "Map Hunter Award" from HERE Map Solutions Pvt. Ltd.

Other Events

- Technical Quiz, EPICS/Micro Projects, Design Thinking, and Hour of Code Events conducted for all CSE students. Certificates and prizes awarded to winners.
- Student Micro Projects Expo conducted — students exhibited self-initiated projects beyond the regular curriculum.

Dassault Systemes Certification 2017

The department conducted a certification exam on behalf of Dassault Systemes on 03/03/2017. 15 to 20 students attended; 90% qualified and were certified by Dassault Systemes.

12. Faculty Development Programs (FDPs)

Topic	Resource Person / Organisation	Dates
-------	--------------------------------	-------

Big Data – Hadoop	Mr. M. Srinivasan, Head, Techy Bees Educon Pvt. Ltd., Hyderabad	23–25 November 2019
Big Data – Hadoop (Two-week FDP)	Mr. M. Srinivas, Head – Big Data, TechyBees EduCon, Hyderabad	5 June 2017 – 19 June 2017
Internet of Things using Raspberry Pi (One-week FDP)	Mr. Yogesh Parnandi, Robotics Research Analyst, Cn Networks, Hyderabad	3 July 2017 – 8 July 2017
Block Chain Technology	Mr. Rajasekhar Kodi, Senior Block Chain Developer, Tech Mahindra, Bahadurpally	28–30 November 2019
Python Programming (Four-day FDP)	Mr. V.V. Appaji (Professor), IIIT Institute of Technology	February 2018

13. Conferences Organised

First International Conference on Artificial Intelligence and Cognitive Computing (AICC-2018)

Hosted by the CSE Department, MLR Institute of Technology. Inaugurated by Secretary Marri Rajasekhar Reddy, Dr. Suresh Chandra Satapathy (PVPSIT), and Principal Dr. K. Srinivasa Rao.

14. Publications

Publications 2019-20

1. Chandra Sekhar Reddy N, Vemuri P, Govardhan A — "An empirical study on support vector machines for intrusion detection" — International Journal of Emerging Trends in Engineering Research (2019).
