

AIRCRAFT PRODUCTION TECHNOLOGY LAB

V Semester								
Course Code	Category	Hours / Week			Credits	Maximum Marks		
A6AE22	PCC	L	T	P	C	CIA	SEE	Total
		-	-	3	1.5	40	60	100
LIST OF EXPERIMENTS								
1.Lathe operations (threading, Boring, Eccentric turning) 2. Milling 3. Drilling and tapping 4. Shaping (making V grooves) 5. Slotting (making slots on pulleys) 6. Surface grinding 7. Planning 8. CNC lathe I. Facing II. Step turning III. Taper turning 9. CNC milling I. Plain milling II. Step milling 10. Preparation of Riveted Joints								
REFERENCE BOOKS: 1.Manufacturing Engineering and Technology by Kalpakjian.								
COURSE OUTCOMES : STUDENTS SHOULD BE ABLE TO:								
1. Demonstrate the hands-on operation of conventional machines i.e lathe and shaping with single point cutting tools 2. Illustrate the hands-on operation of conventional machines i.e planning and slotting with single point cutting tools 3. Develop the code for CNC Lathe and perform machining operation 4. Develop the code for CNC Milling and perform machining operation 5. Perform final finishing processes using surface grinding machine
