

OBJECT ORIENTED PROGRAMMING LAB**II B. TECH- II SEMESTER**

Course Code	Category	Hours / Week			Credits	Maximum Marks		
A4CS11	PCC	L	T	P	C	CIE	SEE	Total
		-	-	3	1.5	30	70	100

COURSE OUTCOMES:

1. Implement Object Oriented programming concept using basic syntaxes of control Structures, strings and function for developing skills of logic building activity.
2. Understand the use of different exception handling mechanisms and concept of multithreading for robust and efficient application development.
3. Understand and implement concepts on file streams and operations in java programming for a given application programs.
4. Develop java application to interact with database by using relevant software component (JDBC Driver).

LIST OF EXPERIMENTS**WEEK-1: JAVA BASICS**

- a. Write a java program that prints all real solutions to the quadratic equation $ax^2+bx+c=0$. Read in a, b, c and use the quadratic formula.
- b. The Fibonacci sequence is defined by the following rule. The first two values in the sequence are 1 and 1. Every subsequent value is the sum of the two values preceding it. Write a java program that uses both recursive and non recursive functions.

WEEK-2: ARRAYS

- a. Write a java program to sort given list of integers in ascending order.
- b. Write a java program to multiply two given matrices.

WEEK-3: STRINGS

- a. Write a java program to check whether a given string is palindrome.
- b. Write a java program for sorting a given list of names in ascending order.

WEEK-4: OVERLOADING & OVERRIDING

- a. Write a java program to implement method overloading and constructors overloading.
- b. Write a java program to implement method overriding.

WEEK-5: INHERITANCE

Write a java program to create an abstract class named Shape that contains two integers and an empty method named print Area (). Provide three classes named Rectangle, Triangle and Circle such that each one of the classes extends the class Shape. Each one of the classes contains only the method print Area () that prints the area of the given shape.

WEEK-6: I/O STREAMS

- a. Write a java program that reads a file name from the user, and then displays information about whether the file exists, whether the file is readable, whether the file is writable, the type of file and the length of the file in bytes.
- b. Write a java program that displays the number of characters, lines and words in a text file.

WEEK-7: EXCEPTION HANDLING

Write a program that creates a user interface to perform integer division. The user enters two numbers in the text fields, Num1 and Num2. The division of Num1 and Num2 is displayed in the Result field when the Divide button is clicked. If Num1 and Num2 were not integers, the program would throw a Number Format Exception. If Num2 were zero, the program would throw an Arithmetic Exception Display the exception in a message dialog box.

WEEK-8: MULTI THREADING

Write a java program that implements a multi-thread application that has three threads. First thread

generates random integer every 1 second and if the value is even, second thread computes the square of the number and prints. If the value is odd, the third thread will print the value of cube of the number.

WEEK-9 :COLLECTIONS

- a. Create a doubly linked list of elements.
- b. Delete a given element from the above list.
- c. Display the contents of the list after deletion.

WEEK-10: CONNECTING TO DATABASE

Write a java program that connects to a database using JDBC and does add, delete, modify and retrieve operations.

WEEK-11: APPLET

- a. Develop an applet that displays a simple message
- b. Develop an applet to perform integer addition. Pass Parameters from applet

WEEK-12 :EVENT HANDLING

- a. Write a java program that handles all mouse events .
- b. Write a java program to demonstrate the key event handlers.

TEXT BOOKS:

1. P. J. Deitel, H. M. Deitel, "Java for Programmers", Pearson Education, PHI, 4th Edition, 2007.
2. P. Radha Krishna, "Object Oriented Programming through Java", Universities Press, 2nd Edition, 2007
3. Bruce Eckel, "Thinking in Java", Pearson Education, 4th Edition, 2006.
4. Sachin Malhotra, Saurabh Chaudhary, "Programming in Java", Oxford University Press, 5th Edition, 2010.
